

| Millages

Millages are tax increases which must be voted on by Citizens where funding is strictly used to complete a specific Public Project.

| How Millages Effect Taxes

Millages are applied after all other Taxes, as part of the "Tax Increases" (after Circumstantial Tax Value). **Millages** are generally a percentage but can also be a flat amount, however it's encouraged to use the percentage option to ensure all Citizens can afford the **Millage**.

| Fund Usage Requirement

The funds acquired through a **Millage** must be used by the Government to fund the Project that was initially agreed on. It is considered a Crime to move funds acquired from a **Millage** to a different goal.

| Citizen Voting

All Citizens must have the ability to vote for or against a **Millage**. A **Millage** vote cannot be open for less than 12 real hours before it is able to be rejected or accepted. When a **Millage** is rejected (by majority) it is discarded and cannot be inquired about via Citizen vote for for 7 real days. When a **Millage** is accepted the tax increase is applied to all Taxes and the Project must be set up using the **Millage** funding.
