Mailboxes

A **Mailbox** is an object which is placed inside of Public Property or just inside of Private Property used to receive items from the Government and Citizens in MC:BSR-S2.

Construction

Mailboxes must meet all of the building specifications; **Mailboxes**:

- Must be made of 1 to 3 containers.
- Must at least one container which is elevated off of the ground
- Must be accessible to all Citizens; **Mailboxes** must not require special items, blocks or traversing of treacherous terrain to access. Treacherous terrain is defined as terrain which risks the life of the player traversing it.
- Must have at least one container which has a sign attached to it which contains the word "Mailbox" with a capital M and the rest lowercase with no extra spacing, letters or extenuating format.
- Can be attributed a **Mailbox** to a specific Citizen or Property it must include an exact match of the name of the Property or name of the Citizen which it is attributed to.

Mailbox Rules

It is considered a Crime to break any **Mailbox Rules**.

Stealing

Taking from a **Mailbox** which is attributed to a different Citizen without permission, a **Mailbox** which is attributed to a Property which you do not own, or a Governmental **Mailbox** when you are not an Elected Official is considered stealing and is not allowed.

Keeping Informed About Mailbox Contents

Important information, Fines, Contracts and Taxes are generally exchanged over mail via **Mailboxes**. While it is *not* directly a Crime for a Citizen to not check their **Mailbox** regularly, it could result in further Criminal Punishments being applied if the terms of Fines Contracts, Taxes or other information are broken while awaiting collection in mail.

Bulldozing of Mailboxes

Mailboxes inside of Public Property must be mailed a request to move the **Mailbox** to a new location in the case that a Citizen who is not attributed to the **Mailbox** in any way will be acquiring Private Property in a location that would result in the **Mailbox** becoming a part of the prospective Private Property. The deadline for this movement must be 5 Minecraft days issuing that the **Mailbox** will be bulldozed if this requirement is not met.

It is the job of the prospective Property Owner Citizen to complete this process under the specifications detailed above.
